

DOG DROPPINGS ARE, LITERALLY, POISON.

WHEN WASHED INTO A BODY OF WATER USED FOR SWIMMING, THEY CAN CAUSE GIARDIA AND SALMONELLA POISONING. INCLUDED POTENTIAL HEALTH PROBLEMS FOR HUMANS ARE CRAMPS, DIARRHEA, AND SERIOUS KIDNEY DISORDERS. ALSO, DOG WASTE CONTRIBUTES NUTRIENTS WHICH ENHANCE ALGAE BLOOMS, THUS CAUSING OXYGEN DEPLETION, WHICH THREATENS ALL AQUATIC ANIMAL LIFE.

SO PLEASE USE PLASTIC BAGS TO PICK UP WASTE AFTER YOUR DOG, PUT IT IN YOUR TRASH AND BRING IT TO THE DUMP.

YOU MAY BE VERY GLAD YOU DID!
